MESSAGE

In today's competitive world, many of us constantly push our children towards achieving academic success. While academic success is important, is it all that is required to have a happy, fulfilled and successful life?

If we read the life stories of some very successful people, we will realize that many of these icons were mediocre students. However, it was their ability to think creatively, analyze things critically and their decision making and problem solving skills that made them stand apart. In other words, we can say, it was their life skills which helped them succeed.

Life skills are the skills that help us cope with our everyday life challenges in a positive and adaptive manner. They help us to cope with stress, manage our emotions and to work collaboratively in teams.

In fact many of our old stories like 'Akbar Birbal Stories', Panchtantra tales or the conventional wisdom which our grandparents and parents taught us are all life skills. So it is very apt to say that Life skills education is the need of the hour. With this realization, the major focus of our Health & Wellness Program is on Life Skills Education. Our Endeavour is to provide an environment in which all students realize their true potential and learn to cope with various challenges in life. Our entire team is committed to the cause of moulding generation Y into empowered & responsible leaders of tomorrow.
