Students Shine Bright in Cybermania

The students of the school presented their exceptional IT Skills in a host of events organised by BBMS as a part of Cybermania, the Inter-school IT Fest, and were adjudged as the **OVERALL RUNNERS UP**.

✨ The students of Classes IX and X participated in the Film Making event and secured the coveted First Position.

✨ In the Dance event, the students were supposed to show Technology Integration with dance. 10 students from classes VI - XI participated & got Second Position.

✨ In 3D Story Design - कथ कथा, Vansh Ahlawat and Ishaan Singh of Class 8 secured the Second Position.

✨ In the event Comic Strip Making, the students bagged the First Position.

✨ In the event 'Yantriki' our junior team comprising of Chitransh, Shlok, Manvi and Rudrashi of class V bagged the Second Position.

The School Celebrates 23rd Foundation Day with Pride and Elation

The future belongs to those who believe in the beauty of their dreams."

On October 25, 2023, the school proudly celebrated its 23rd Foundation Day, marking a significant milestone in the institution's journey. The day was filled with reverence and enthusiastic participation from both students and staff.

The celebration commenced with a serene Hawan ceremony held in the school premises. The Hawan, a sacred ritual, symbolised the divine blessings and spiritual essence that have guided the school's growth over the years.

Talented Tech Wizards Make A Mark At Amity Inter-School

Tushar and Aarush of XI performed exceedingly well and bagged prizes in the Inter-school IT Competition CyberBuzz organised by Amity International School Sector-43, Gurgaon. They both bagged the second position.

The School Receives Stem School Education Award at India Stem Awards 2023

It is a proud moment as the school has received the STEM School Education Award 2023 and has been declared as a school that has demonstrated extraordinary performance in STEM during the past academic year, as recognized by the All India Council for Robotics and Automation at a glittering ceremony on 16th October 2023 at Dr Ambedkar International Centre, New Delhi.

The School Honored with Prestigious SDG Award for Education through Sustainable Development

The school has been awarded with 'SDG AWARD IN EDUCATION THROUGH SUSTAINABLE DEVELOPMENT CATEGORY' as a part of Global Sustainability Awards 2023 for its exceptional work in the area of SDGs (Sustainable Development Goals) by ARC. The school was conferred with the award on October 16, 2023 in a ceremony held at India International Centre, New Delhi. The award was presented to the school in appreciation and recognition of its efforts to foster the culture of sustainability among children through education for a better future. 15+ countries across 5 continents across the globe participated in the event.

A Radioactive Sea of Magma Hides Under the Surface of Mars

The finding contributed to illuminating why the red planet's core is not as massive as previously thought.

It appeared as though Mars had an unexpectedly large heart in 2021. The robotic lander InSight has been helping scientists learn more about the interior of the planet. The satellite had recorded enough seismic activity to create an image of the stratified Martian landscape. There was nothing very unusual about the mantle or crust. But for a planet that small, the core was too big and too thin. That core measurement didn't seem accurate to some researchers.

In two investigations, researchers reassessed the seismic record of InSight, which was published on Wednesday in the journal Nature. Both teams separately concluded that Mars's core is more similar to the world's heart than was previously thought. An undiscovered ocean of molten rock that is 90 to 125 miles deep caused the first, larger-than-true estimate of the core's size

For over a century, geologists have used the seismic waves produced by earthquakes to study the Earth's geologic layers. This allowed them to independently discover Mars's buried magma ocean.

Its presence indicates that the radius of the liquid core is closer to 1,000 miles, making it an easier-to-understand, denser sphere that is rich in iron and has lighter elements.

Mars had an atmosphere that was protected by a magnetic field until it collapsed 3.8 billion years ago. Scientists believed that a cooling liquid iron core, swirling violently, was the source of the magnetic field. A magmatic blanket covering it, however, would have kept the centre uncomfortably warm.

No decision yet on replacing 'India' with 'Bharat': NCERT

A high-level social science committee was formed by the National Council of Educational Research and Training (NCERT) to examine the curricula in schools. The committee recommended replacing the name "India" in textbooks with the word "Bharat." The committee has also suggested that the exploits of Hindu warriors be taught in the curriculum.

Calling it "too premature to comment", NCERT said, "No decision had been taken yet on the panel's recommendations." Some opposition parties responded strongly to the panel's

recommendations. "They are suggesting so many things," stated KC Venugopal, general secretary of Congress. It's evident how they are misrepresenting Indian history in textbooks, curricula, and other materials. India and India are equal in our eyes.

It demonstrates the PM's fear of the India alliance. His allies are turning against him. AAP member Priyanka Kakkar stated, "Efforts should be made to focus on issues of joblessness, inflation, and corruption instead of changing name."

Aditya- L1 (Update)

The Indian Space Research Organization (ISRO) proudly announced a significant milestone in its space exploration

endeavors. Their spacecraft has achieved a remarkable feat by traveling beyond a staggering distance of 9.2 lakh kilometers from Earth, effectively breaking free from the gravitational influence of our planet. Currently, it is embarked on a captivating journey towards the Sun-Earth Lagrange Point 1 (L1), marking a momentous event in India's space exploration history.

This achievement is especially notable because it marks the second consecutive instance where ISRO has successfully sent a spacecraft beyond Earth's sphere of influence. The first such achievement was realized with the renowned Mars Orbiter Mission, highlighting India's growing prowess in the field of interplanetary exploration.

ISRO's dedication, technical expertise, and relentless pursuit of knowledge have propelled India into the global space exploration arena, solidifying its position as a significant player in the quest for understanding and harnessing the mysteries of our solar system and beyond.

The School Celebrates World Mental Health Day 2023

World Mental Health Day 2023 provided a chance for individuals and communities to ardently contribute to the theme, 'Mental Health is a Universal Human Right,' fostering understanding, awareness, and initiatives aimed at safeguarding and enhancing everyone's mental well-being as an inherent human entitlement.

The Middle Wing hosted an event on 'Creating Positive Self-Affirmation Badges for Mental Health Day to Promote Self-Esteem and Mental Well-Being', where students made badges with positive self-affirmations to enhance their self-esteem and well-being. Additionally, the Senior School students were shown a video on mental health and received an address from the Health & Wellness Ambassador and Peer Mentor, who emphasized the importance of emotional well-being for overall health and personal success.

The School Celebrates Festival of Dussehra

Dussehra, a festival celebrating the victory of good over evil, reinforces our commitment to kindness, generosity, and the path of righteousness. To impart the profound message embodied by this festival, the students of Grade II and Sarojini Naidu House (Primary Wing) organised Special Assemblies in different slots on October 19 & 20, 2023.

In the Primary Wing Assembly, the students not only presented an inspiring poem and a song that left an indelible mark on the audience but also highlighted how the teachings from this festival continue to hold great significance even in the present time.

The assemblies concluded with the energetic dance presentations that soaked everyone in the spirit of the festival, with all the students and teachers dancing to the beats of dandiya.

The School's Educational Expedition to Sariska National Park

The school organized an educational trip to Sariska National Park on October 12 & 13, 2023 for its Class III-V students. The 63 students and 6 teachers participated in this expedition to delve into the beauty and complexities of nature, which allowed them exploration opportunities and valuable learning experiences.

The educational expedition allowed the learners to appreciate the significance of national parks in maintaining ecological balance. It also let them grasp how every plant and animal has a part to play, making the students aware of the delicate harmony of nature. The trip to Sariska National Park will remain a cherished memory for the students for a longtime.

Blue Bellians' Day Out at Deeg Palace

The school's students and teachers recently visited Deeg Palace, an 18th-century palace located in Deeg, Rajasthan. The visit aimed to give the students a deeper understanding of history, science, and economics through a hands-on learning experience. At Deeg Palace, the students were able to analyze the monument from various perspectives, including its design, engineering, and history. They found that the palace's gardens were inspired by Mughal Charbagh, featuring decorated flowerbeds, shrubs, trees, and fountains to cool the place during summer. The students also learned about two water tanks, Gopal Sagar and Rup Sagar, and their functions in bringing down the temperature of the palace in the absence of air conditioning. The students were able to engage in observation, decoding, and inquiry and the visit served to spark curiosity and motivate for deeper learning. The students' enjoyment and appreciation of the educational trip reflects the success of the initiative to take learning beyond the four walls of the classroom.

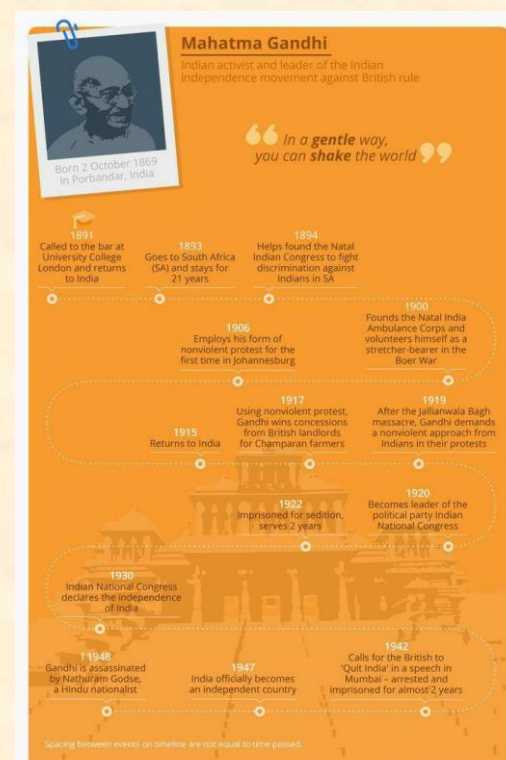

Mahatma Gandhi and His Enduring Commitment to Non-Violence

Mahatma Gandhi, the father of the Indian nation, is remembered not only for his role in India's struggle for independence but also for his unwavering belief in the power of non-violence. His principles of non-violence, or "ahimsa" as he called it, have left an indelible mark on the world's history and continue to inspire countless individuals and movements for social change. Gandhi's journey towards non-violence began in his early years when he witnessed the injustices and discrimination faced by Indians in South Africa. His experiences there led him to adopt a philosophy of peaceful resistance as a means to address oppression and discrimination. This philosophy soon became the cornerstone of his life's work.

One of the most remarkable aspects of Gandhi's commitment to non-violence was his ability to turn it into a powerful tool for change. Through methods like civil disobedience, strikes, and boycotts, he showed that non-violence could be a force capable of challenging even the mightiest of empires. His leadership in the Salt March and other movements proved that passive resistance could lead to active change.

Gandhi's non-violent approach was deeply rooted in the idea that individuals should resist evil without resorting to physical violence. He believed that non-violence required tremendous courage and self-discipline. It was not a sign of weakness but a powerful means to bring about societal transformation.

Aloo Frankie Recipe -Aaina Hiwal, VI-C

Healthy as well as a tasty treat would be like a dream for children and when it comes to easy to make and no wastage it's a mom's kind of food. Based on all these qualities aloo frankie is a delicious meal which would satisfy everyone's hunger as well as needs. So here is the recipe for the same, do try it!

1. Take a bowl and add chilli powder - 1 table spoon
2. Now add turmeric - half tea spoon
3. Add cumin powder - 1 tea spoon
4. Add coriander powder - 1 tea spoon
5. Now add garam masala - half tea spoon
6. Add chaat masala - 1 tea spoon
7. Add aamchur powder - 1 tea spoon
8. Add pepper powder - 1/4th tea spoon
9. Add salt - half tea spoon
10. Now mix well - your frankie masala is ready
11. Take another bowl and add vinegar - half cup then add 2 finely chopped green chillies - this is your green chilli vinegar
12. Next take a pan and add oil - 2 table spoon
13. Now add 2 finely chopped garlic to the same then ginger approx. 1 inch
14. Also add 1 finely chopped chilli then saute well
15. Then add 3 table spoon tomato sauce then saute(mix) the pan for 1 min.
16. Then add 1 table spoon frankie masala to the pan
17. Mix well - low flame
18. Then add potato - 2 boiled and mashed
19. Also add paneer - 1 cup, grated
20. Add salt - half tea spoon and mix well
21. Then add coriander - 2 table spoon, finely chopped
22. Mix well - cool completely
23. After take the mould and shape pattie
24. Take hot tawa and heat the pattie- roast medium flame
25. Cook both sides- your patty's ready
26. Now take a roti spread butter and hot both sides - roti's ready
27. Place roti on a plate spread green chutney
28. Place aloo patty and garnish with chopped onions
29. Spread - 1 tea spoon chilli vinegar and spread a bit of frankie masala
30. Garnish with tomato sauce and add cheese - grated
31. Roll tight
32. You can make more frankies by repeating steps 26 - 31.

The Legacy of Kindness

We reflect our character and our values. If we treat people with kindness, respect, and compassion, we will leave a positive impression on them that will last for a lifetime. We may not always remember the names of the people we meet, but we will remember how they made us feel. Nowadays, it is EQ (Emotional Quotient) that matters more than IQ (Intellectual Quotient). It is a known factor that we can do something or the other in our lives to earn our living but if we add empathy, humility, honesty in our day to day dealing, it will make us happy as well as others around us. We must leave a legacy of kindness among our children so that we live in a conducive environment where we respect each other irrespective of caste, religion, gender etc. Let us start each day thoughtfully as to what one good deed we will do during the day that makes others happy and viz a viz self!

- **Giving-** Do kind things for others if you want to feel good. doing good is a great place to start with. Helping and being kind not only contributes to the happiness of others, it can also help us to feel happier!
- **Relating- Connect with people** -Feeling connected to other people is at the heart of happiness - theirs and ours. Having close relationships with family or friends provides love, meaning, support and can increase our feelings of self-worth. Our broader social networks, like those at school or work, can contribute to a sense of belonging. Indeed, studies show people with strong relationships are happier, healthier and may even live longer.
- **Exercising** -Take care of your body. Taking care of your body is good for your mind, they're connected! There are lots of ways we can look after ourselves physically - exercising, moving more during the day, getting enough rest, eating nourishing food, staying hydrated and getting out into daylight. These all directly impact how well we feel and function. They can be instant mood boosters as well as being good for our mental and physical health longer term.
- **Direction** -Have goals to look forward to, how we feel and think about the future and how we work towards it can make a difference for our happiness in the present. Having a sense of direction, optimism and hope can all contribute to feeling happier.
An optimistic or hopeful outlook means we are more likely to experience positive emotions, feel more confident, have higher satisfaction with life, have better physical health and are less likely to be depressed.
- **Acceptance** - Be comfortable with who you are. No one is perfect, yet we often expect ourselves to be! When we learn to accept ourselves, we are likely to be happier and better at learning and growing! How we feel about ourselves can have a big influence on how happy and resilient we are. Accepting that, like all human beings, we have strengths and imperfections, we'll make mistakes and sometimes fail is an important component of psychological wellbeing.
- **Resilience** - Find ways to bounce back, everyone has ups and downs - difficulties are part of life for us all. Science shows we can learn skills, actions and habits of thinking that boost our natural resilience. We all experience small daily frustrations and everyday stresses and at times, bigger upsets, failures, unexpected change, and challenges. Many of us will also experience traumatic events at some point in our lives such as the loss of someone we love, not scoring well in exams. Being resilient doesn't mean we will never feel pain, upset, hurt, sadness, fear, or anger when we experience difficult times. It means in the moment or over time we can find ways to cope constructively, accept what has happened, adapt, work towards making it better and eventually move forward.
- **Emotions** - Look for what's good, The positive power of pleasant emotions. They don't just feel good; they bring positive benefits. Emotions are more than feelings. They include momentary physiological changes which influence our actions and add up. Whilst unpleasant emotions like fear evolved to help us survive by avoiding danger, for example, by triggering a 'fight, flight or freeze response, it wasn't until relatively recently that the power of pleasant emotional experiences was also recognised.
- **Meaning** - Be part of something bigger. Meaning matters for a fulfilling and happy life. We all matter and can make a difference to something bigger, beyond ourselves. When asked people what happiness means to them, their initial thoughts usually describe pleasures – things that in the moment bring joy or other fleeting, positive feeling emotions. However, soon their thoughts turn to a different type of happiness. Friends, family, school, pets, work, volunteering, learning, hobbies, creative pursuits like making music or art, nature, faith – examples of things that give life meaning. Working on and towards these things doesn't always feel pleasurable at the time but enables longer-term satisfaction and fulfilment.

“Kindness is not what you do, but who you are.”

Dr. Preeti Phutela
Senior Wing Leader

Book Review: Little Women by Louisa May Alcott

Little Women is a classic in the genre of literary fiction, it is a coming-of-age novel that I believe, must be read by every young individual. The novel explores the life of the four main protagonists, Meg, Jo, Beth and Amy that also happen to be sisters. They are what is considered a “lower class” family but nonetheless, do not fail to find happiness in the darkest of times. Their father, during the course of this book, has been described to be a preacher with the Union Army during the American Civil War and they live with their mother who has been given the adorable nickname “Marmee” by the four sisters. She is forthright, one of the strongest book characters that I have ever read about, and the sisters are extremely lovable characters. The book explores the themes of love, grief and friendship most of all. It explains beautifully, that when we see no light in our lives, love is the flame that guides us to the right path and that honest and true intentions are one of the most valuable companions that one can have.

Story: Everyone Needs Peace and Harmony

A long time ago, there was a precious sword that belonged to a great king. This king would spend all his time enjoying parties and shows in his grand palace. It was one day that some dispute broke out between him and the king of one of his neighbouring countries. The dispute grew out of hand and it came to a point where both kings had to declare war against each other.

The sword became very excited as this would be the first time it would be used in a real battle. It would be able to show its extraordinary talent and bravery to everybody and would also gain renown and fame throughout the kingdom. On its way to the front line, the sword started imagining itself as the winner of several battles. But upon their arrival, the first battle was already over, and the sword glimpsed upon the results of the war. The picture it saw did not look like anything it had imagined. There were no elegant knights in shining armours, victorious, with gleaming weapons out in the Sun. Instead of that, the sword could see shattered weapons and hordes of men dying out of hunger and thirst. There was hardly any food remaining for the warriors. Dirt covered all that could be seen and men were wrapped in a disgusting smell. Some of them were half dead, laying on the ground, and bleeding out from their wounds.

Upon seeing this, the sword realised that it didn’t like wars or battles anymore. It decided that it would rather live in peace and, at most, take part in tournaments and competitions. Thus, the night before the great battle, the sword came up with an amazing plan to prevent it. The sword suddenly started vibrating. At first, it was a low buzz that gradually grew louder. Soon, it became a sharp metallic noise. This caused confusion among the swords and armours belonging to other soldiers, who then asked what the matter was. The king’s sword told them that it did not want a battle to take place the next day and that it did not like war. Another sword answered, “No one likes battles, but what can be done?”

“Vibrate yourselves, just like me!”, exclaimed the king’s sword. “If we can create enough noise, then nobody shall be able to sleep”. Soon, all the weapons began to vibrate, and this created a deafening sound. The sound was so loud that it even reached the enemy camp, where the enemy weapons also joined the protest as they too were against wars and battles. It was soon morning and the soldiers were required to go on battle, but not a single soldier could get himself to fight. No soldier was able to sleep the previous night, not even the two kings and their generals. Hence, they decided to spend the entire day trying to get some sleep. It was in the evening that they woke up and thought of putting the battle off until the next day.

But the weapons were not going to let that happen. Led by the king’s sword, they again spent the whole night singing their song of peace. As usual, the soldiers couldn’t get any sleep. The battle got postponed again and again until on the evening of the seventh day, the two kings decided to meet to discuss the situation. Both of them were very annoyed and angry about the dispute that was caused between them, but after spending some time with each other, they started discussing the nights without sleep, the confusion, and chaos among their soldiers, finding no difference between day and night and the astonishing situations that were created by this song of peace. Soon, both these kings started laughing and giggling, just as friends do.

Finally, the two kings let go of their disputes and decided to end the war, and they returned to their own land. They felt the joy of avoiding a fight, as well as having regained a lost friend. This time onwards, the two kings would often meet each other to discuss their experiences about their kingdoms. It had come to their realisation that the things uniting them were more in number than the things that were setting them apart.

-Sambhavi Singh, IX-C

Essay

Non-violence and harmony are the cornerstones of a just and peaceful society. Their importance lies in the profound wisdom that they embody. Non-violence, as championed by figures like Mahatma Gandhi, reveals the strength of the human spirit to effect change through compassion rather than force. It is a testament to the power of dialogue over conflict, a forceful way to mend the wounds of a divided world.

Harmony, on the other hand, signifies the delicate equilibrium of coexistence. In a world marked by diversity, it is the symphony of unity that resonates most beautifully. It is in harmony that we find shared values, cooperation, and the capacity to build bridges across divides. In a harmonious world, people are free to express their individuality while working towards collective betterment.

Together, non-violence and harmony form the foundation of a society where respect, empathy, and understanding reign, paving the path to lasting peace and progress.

When You Feel Overwhelmed

GET PROPER SLEEP

When we don't get proper sleep, we get cranky, foggy headed, and unproductive. All of which makes us feel overwhelmed.

LET IT GO

You cannot control everything. Sometimes you just need to let it go, move on, and choose peace.

BELIEVE IN YOURSELF

You are amazing and unique. Loving yourself is an important component to having a life of peace and harmony.

PRIORITIZE

You cannot do it all. Make a list, and do one thing at a time in order of priority. If you don't finish move what's left to tomorrow.

JUST SAY NO

You cannot be all things to all people. Learn to say no. It is OK to say no. You need to make YOURSELF a priority too.

TAKE A BREAK

It's important to take breaks throughout your day. A nice 10 minutes of deep breathing will do wonders for you.

SET GOALS

Having something to work towards gives you something to look forward to... something to be excited about.

GRATITUDE MATTERS

A thankful heart is a happy heart. Take the time each day to find things to be grateful for. There is ALWAYS something.

YOU ARE A ROCKSTAR! DON'T FORGET THAT!

Blue Bells Triumphs at Clusters

The Under-19 team of the school showcased their exceptional talent and unwavering determination during the Inter-school CBSE CLUSTERS Football Tournament, hosted at Birla Children’s Academy in Sonipat. This prestigious tournament featured participation from esteemed schools across the state. Under the adept leadership of Captain Aakash Phogat, the Under-19 boys' team impressively advanced through the initial bracket with a resounding 3-0 victory over St. Michael's School. Notably, Viraj Gulia, the team's striker, netted two goals, while Prakhar, another striker, contributed one goal. The team displayed remarkable expertise in both offensive and defensive aspects of the game, with Dhruv Suhag, the sports captain, expertly guarding the defensive line.

We extend our heartiest wishes to the team as they continue to compete in their upcoming matches.

The School Makes A Mark At State Level Roller Ball Championship

I'm not going to tell you how many times I fell before I nailed this."

With immense pride and pleasure, we share the achievement of Harshit Dhaka, a student of Grade VIII of Brahm Dutt Blue Bells Public School at the State Level Under-17 Roll Ball competition which was held at the HUDA Sports Complex in Kaithal.

In addition to the overall commendable performance in the games, Harshit's team, because of the regular practice and dedication, secured Bronze medal in the event. Experienced players from various districts participated in the event.

India Shines at Cricket World Cup 2023

In the Cricket World Cup 2023, India has exhibited an exceptional performance that underscores their dominance in the sport. Under the able leadership of Captain Rohit Sharma, the 'Men in Blue' have achieved a perfect record, winning all five of their matches. Notably, they have overcome strong opponents such as New Zealand and Australia, showcasing their mettle in high-stake encounters. This remarkable success owes itself to the outstanding performances by every member of the team, from bowlers to batsmen. As India advances in the tournament, we extend our best wishes for their future matches, confident that their unwavering dedication and skill will continue to shine on the cricketing world stage.
